“Help me to think for myself”

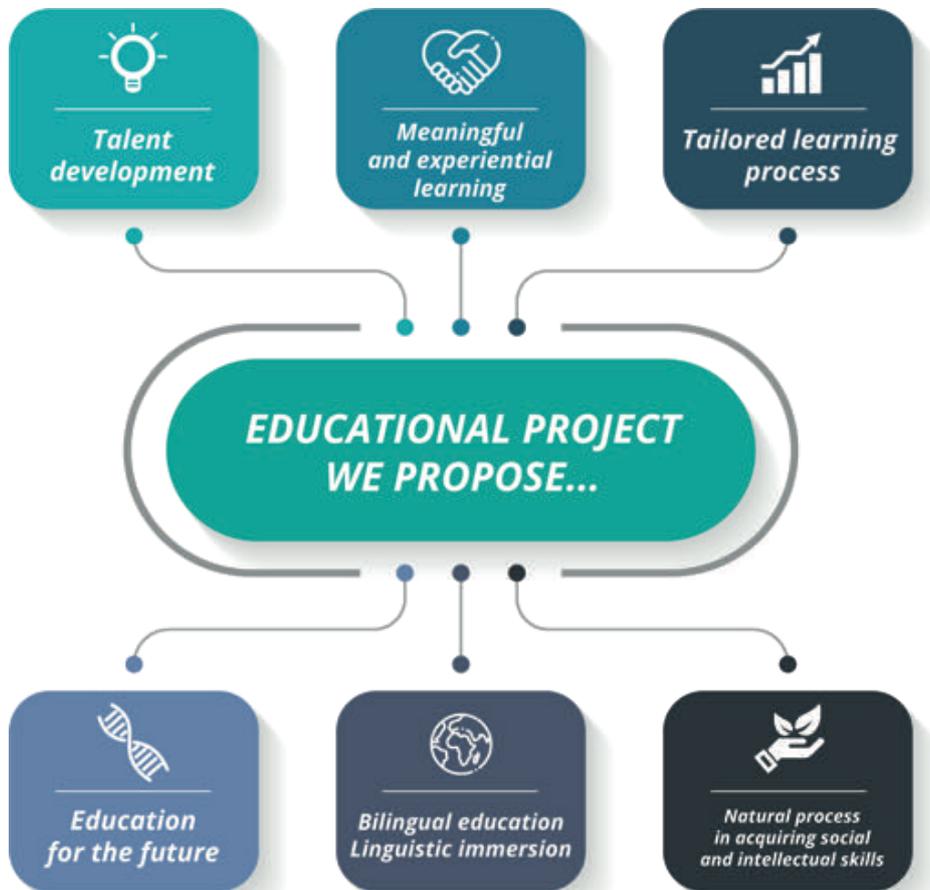

GREENLEAVES MONTESSORI
American School

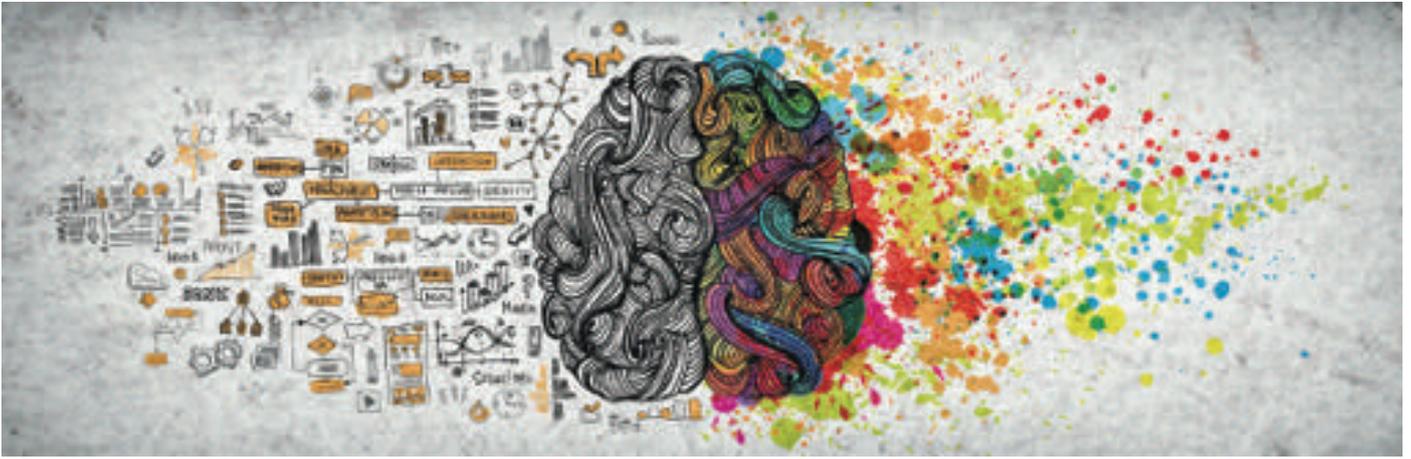

“Let the children be free; encourage them; let them run outside when it is raining; let them remove their shoes when they find a puddle of water; and, when the grass of the meadows is damp with dew, let them run on it and trample it with their bare feet; let them rest peacefully when a tree invites them to sleep beneath its shade; let them shout and laugh when the sun wakes them in the morning”

María Montessori

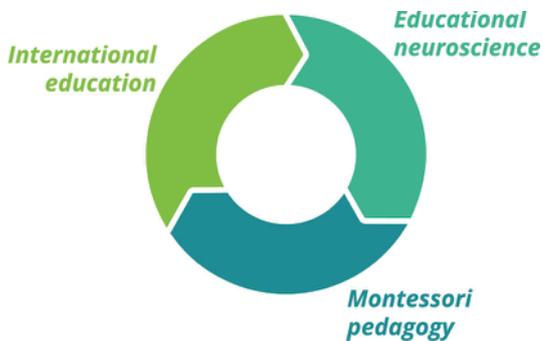

Educational project

How to achieve it

Educational neuroscience

Each learning process is unique and individual...

Therefore, we have created our own educational project based on cerebral integration, through two clearly differentiated programs:

- Work program (executive functions)
- Creative program (soft skills).

Montessori pedagogy

It is characterized by offering a prepared environment:

ordered, aesthetic, simple, real... where every element has its reason in children's development.

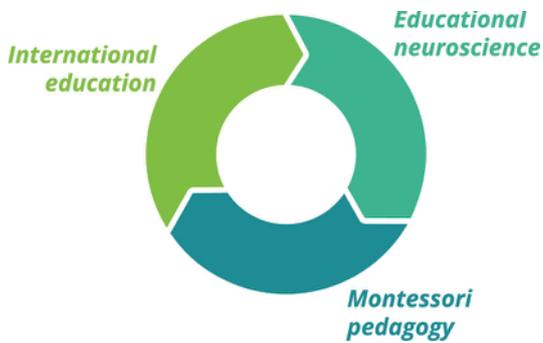

In the Montessori classroom, we integrate ages comprised in 3-year periods, which naturally fosters socialization, respect and solidarity.

Educational project

How to achieve it

Educational neuroscience

Our goal as an international school is to offer quality bilingual teaching without the need to study abroad.

To do this we are governed by the standards of the IB program (International Baccalaureate) offering four demanding and high quality international education programs for students from 3 to 19 years old.

These programs promote the personal and academic development of students and encourage them to think critically and transdisciplinarily, fostering diversity, curiosity and eagerness to learn, in the integral development of the child and their ability to research.

By actively participating in an evaluation and continuing, students begin a regular learning effectively and be able to act on constructive feedback.

Students

How to achieve it

Our goal is...

We are committed to an individualized, quality education, outside the traditional standards of the current educational system.

Children at our school acquire at least the “same final product” as in a traditional center but are fully prepared and for everything necessary in their lifelong adventure, as they are used to freely exercising their own judgment and will, guided by their imagination and their enthusiasm to learn.

Only children like these are able to fully exercise their tasks as citizens of a civilized community.

The prepared environment at Greenleaves Montessori

Our spaces are called “prepared environment”

-  Stately house
-  Wide open spaces, bright, warm and natural
-  Mixed groups
-  Direct contact with nature
-  Animal care and work in the school garden

At Greenleaves Montessori, we give major importance to designing and organizing environments.

A large part of our work is centered especially on observing and knowing the present needs that evolve in each child, so as to create a space for optimal, significant work.

Our spaces are called “prepared environments” because they are specially designed by and for children’s enjoyment.

They are carefully organized to foster their self-learning and growth.

They are expansive, well-lit spaces with natural light to promote movement, concentration and tranquility, where what prevails is the cleanliness and order that directly influence the organization of a child’s mind.

Family friendly Families support

En Greenleaves ofrecemos

-  Transparency
-  Cooperation
-  Communication
-  Parents' school
-  Family events

We believe that cooperation and coordination of school and family are fundamental to encourage children's new learning and integral development.

Therefore, from Greenleaves, we offer:

- Transparency.
- Cooperation.
- Personalized communication: web application, in-person meetings and quarterly reports.
- Parents' school
- Family events

Diet

Natural and nutritious dining area

Natural and nutritious dining area

Greenleaves Montessori works with Native where healthy and nutritious plates are made. 100% natural, seasonal and local products are used, nutritionally balanced and adapted by growth stages.

Through a respectful cuisine with producers, raw materials and nature, and always from the nutritional balance, dishes with all the flavor and the greatest contribution of macro and micronutrients result.

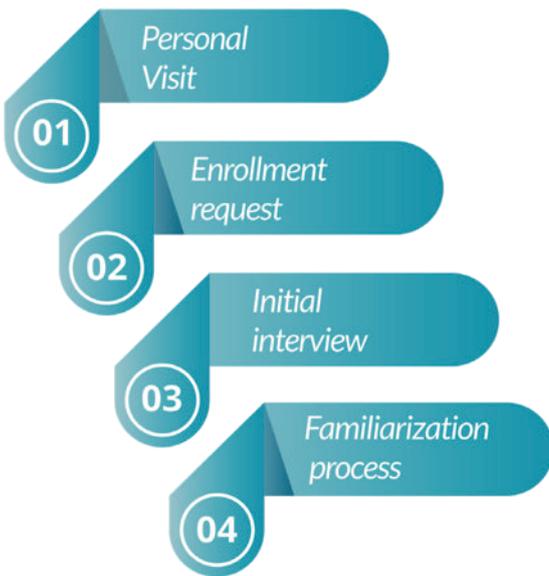

We are fully convinced that the best way to feed ourselves is to recover natural and non-aggressive processes.

Admission procedure Choose a school

Our application procedure

Choosing a school is a very personal decision that requires careful consideration.

If families are considering the possibility that their children attend our school, we would like them to have a full understanding of the Montessori method and the educational project we carry out.

- Montessori method
- Our educational project

For this reason, we ask that they follow each of the steps in our application procedure.
